

**CONSTRUCTION INDUSTRIES DIVISION
GUIDELINES AND PROCEDURES
FOR
APPROVAL OF ELECTRICAL CONTINUING EDUCATION COURSES**

I. Administrative Information.

- A. Objective. These guidelines and procedures are made available to assist those individuals who have an interest in obtaining approval of course work taken or to be taken for renewal of an electrical journeyman certificate issued by the Construction Industries Division (CID), pursuant to the continuing education requirements set forth in 14.6.4.8 D,E, F NMAC.
- B. Scope. These guidelines and procedures apply to any education course, class or other type of program of study (collectively referred to as “course”) submitted for approval in satisfaction of the continuing education requirements set forth in 14.6.4.8 D, E, F NMAC.
- C. Effective Date. July 1, 2004
- D. Duration. Permanent

II. Approval Procedures.

- A. Application.
 - 1. Course Approval.
 - a. An application for course approval, approved by the Division, must be submitted for each course to the Electrical Bureau.
 - b. The application must include the following information:
 - (i) The name and a detailed description of the subject matter or content of the course and a statement identifying the relevance of the course to the practices and procedures currently followed in the electrical trades in New Mexico.
 - (ii.) The total number of hours of instruction.
 - (iii.) The name, address, phone and email information for the instructor(s) for the course.
 - (iv.) The date, time and location of the course.
 - (v.) The cost of the course.
 - (vi.) The name, address, phone and email information of the institution or entity that offers or sponsors the course.

- (vii.) The name, address, phone and email information of the person or entity submitting the application for approval.
 - c. An application for course approval must include the following attachments:
 - (i) A sample of the certificate of course completion that is issued by the instructor and/or the institution or entity sponsoring the course to attest that an individual has attended and successfully completed the course. The certificate must include the date, time, location and title of the course, the name of the institution or entity sponsoring the course, the number of instruction hours, the instructor(s) name(s), the name of the attendee and the attendee's New Mexico journeyman certificate number.
 - (ii) A sample of the course evaluation form used by the sponsoring institution or entity to gather input on the course. The evaluation form must include the date, time, location and title of the course, the name of the institution or entity sponsoring the course, the number of instruction hours, the instructor(s) name(s) and a rating scheme that allows the attendee to express his or her opinion of the value of the course and the instruction.
 - (iii) A sample of any evaluation tool that is used by the instructor to rate or grade the participation of the attendee in the course.
 - (iv) A course outline and format, which give a general description of the course and the anticipated class size(s).
 - (v) A schedule of classes indicating the location(s), date(s) and time(s) of the course submitted for approval. Except online or home study courses.
 - (vi) Copies of any written material, visual aids, bibliographies, power point presentations or other information provided or required in connection with the course.
2. Instructor Approval.
- a. An application for instructor approval, approved by the Division, must be submitted for each instructor to the Electrical Bureau.
 - b. The application must include the following information:

- (i) The name, address, phone and email information for the applicant.
 - (ii) The name, address, phone, and email information of the institution or entity that offers or sponsors the course.
 - (iii) The title of course(s) that will be taught.
- c. An application for instructor approval must include the following attachments:
 - (i) A copy of the applicants teaching certificate, trade license or certification, and/or other qualifying documentation
 - (ii) Letter(s) of verification of the applicants teaching experience in the electrical trade from educational institutions, state, city or county entities, or other trade groups that have received training by the applicant.
 - (iii) A list of any other experience which qualifies the applicant as an instructor for the course listed.

B. Approval Procedure – Course and Instructor.

- 1. Criteria to be considered for approval shall include:
 - i. No course will be approved unless any instructor teaching the course has been separately approved by the Commission according to the guidelines provided for instructor approval, above.
 - ii. The course subject matter or content of the course must be relevant to the current practices and procedures followed in the electrical trades in New Mexico.
 - iii. The course must present material that is consistent with the current laws, rules and codes that are applicable to construction in New Mexico.
 - iv. The information presented in the course and associated material must be accurate, current and substantive.
