

LOOK OUT!

CYBERATTACKS CAN STRIKE ANYONE. ANYTIME.

BE CYBER-SAFE:

Use strong passwords.

Think before you click.

Update your software.

Use multifactor authentication.

While you're making your way through life, cybercriminals could be making their way through your computer, your email, or even your bank account. And if you think you're not worth being the target of a cybercrime, think again. Avoid being the victim of a cyberattack now by taking easy steps to be cyber-safe.
