

INDUSTRY BULLETIN: 24-07

Dear Licensee and Interested Parties,

The Cannabis Control Division (CCD) is sharing an important document titled "[New Mexico Registered Pesticides for Use in Cannabis Cultivation](#)," which provides a comprehensive overview of registered pesticides that can be utilized in the cultivation of Cannabis species in New Mexico.

This document, produced by the New Mexico Department of Agriculture, outlines critical information regarding pesticide use, including compliance with the New Mexico Pesticide Control Act and the review process for pesticide products. It also highlights the importance of following labeled instructions for pesticide application to protect consumers, workers, and the environment.

Please review the document carefully to ensure that your cultivation practices align with the state's regulatory guidelines.

Sincerely,

Cannabis Control Division
