

NEW MEXICO'S TRACK-AND-TRACE IS CHANGING

NMS2S Product Type Description Guide

Product Type Name	Product Description	Testing Details
Cannabis Packaged	Packaged Final Product: Packaged cannabis (e.g., flower/trim)	Creating this product requires its input to be full panel tested
Cannabis Tincture Packaged	Packaged Final Product: Packaged Alcohol- or oil-based cannabis tinctures (oral or sublingual)	Creating this product requires its input to be full panel tested
Cannabis Tincture Unpackaged	Bulk tincture solution, not yet in final packaging, awaiting final portioning, bottling, and labeling.	This product may be created with untested inputs
Clones	Live cuttings intended for cultivation, or packaging for retail sale.	N/A
Clones Packaged	Packaged Final Product: Packaged Clones intended for retail sale.	N/A
CO2 Extraction Process Material	Cannabis plant material designated as feedstock for CO2 extraction (not a Final product). Tracked to show source biomass allocated to the CO2 extraction process.	This product cannot inherit its input product(s) test results
Collected Trim	Ground or trimmed cannabis material removed during processing of flower.	This product may be created with untested inputs
Collected Waste	Cannabis waste (e.g., spent biomass, unusable material) requiring secure storage, logging, and compliant destruction/disposal. Not for sale or consumption.	This item may be tested at licensee discretion
Concentrate (CO2) Packaged	Packaged Final Product: Packaged Cannabis concentrates produced via CO2 extraction (e.g., oils, wax).	Creating this product requires its input to be full panel tested
Concentrate (CO2) Unpackaged	Bulk CO2 concentrate awaiting final portioning/processing/packaging	This product cannot inherit its input product(s) test results
Concentrate (CO2) Vaporizer Packaged	Packaged Final Product: Packaged vape cartridges/devices filled only with CO2-derived cannabis oil, includes device and filled oil.	Creating this product requires its input to be full panel tested
Concentrate (CO2) Vaporizer Unpackaged	Bulk CO2 Concentrate vape devices, not yet in final packaging,	This product cannot inherit its input product(s) test results
Concentrate (non-volatile solvent) Packaged	Packaged Final Product: Packaged concentrates produced using solvents not classified as volatile under applicable regulations (Mechanically extracted).	Creating this product requires its input to be full panel tested
Concentrate (non-volatile solvent) Unpackaged	Bulk non-volatile solvent (mechanically Extracted) concentrates awaiting portioning/processing/packaging	This product cannot inherit its input product(s) test results

NEW MEXICO'S TRACK-AND-TRACE IS CHANGING

Concentrate (non-volatile solvent) Vaporizer Packaged	Packaged Final Product: Packaged vape products filled concentrates created via mechanical extraction.	Creating this product requires its input to be full panel tested
Concentrate (non-volatile solvent) Vaporizer Unpackaged	Bulk non-volatile solvent (mechanically extracted) concentrate vape devices, not yet in final packaging,	This product cannot inherit its input product(s) test results
Concentrate (Volatile Solvent) Packaged	Packaged Final Product: Packaged concentrates produced with volatile solvents (e.g., butane, propane), such as shatter, budder, or live resin.	Creating this product requires its input to be full panel tested
Concentrate (volatile solvent) Unpackaged	Bulk volatile-solvent concentrates prior to final portioning / processing / packaging.	This product cannot inherit its input product(s) test results
Concentrate (volatile solvent) Vaporizer Packaged	Packaged Final Product: Packaged vape products using volatile-solvent concentrates (e.g., hydrocarbon extracts).	Creating this product requires its input to be full panel tested
Concentrate (volatile solvent) Vaporizer Unpackaged	Bulk volatile-solvent concentrate vape devices not yet in final packaging.	This product cannot inherit its input product(s) test results
Deli Style Cannabis	Retail flower sold by weight from bulk (e.g., deli-style jars).	This product does inherit its input products results.
Dry Flower	Dried, cured cannabis flower in bulk form (not yet retail-packaged). Typically used for wholesale, pre-rolls, or further processing.	This product's input "Wet Flower" Cannot be tested.
Fresh Frozen	Freshly harvested cannabis frozen promptly to preserve volatile compounds. Common feedstock for extraction processes.	This product's input "Mature Plant" Cannot be tested. This product's input "Mature Plant" Cannot be tested.
Infused Cannabis Material (Concentrate CO2) Packaged	Packaged Final Product: Packaged cannabis material (e.g., flower/trim) infused or coated with CO2 concentrate (e.g., moon rocks).	Creating this product requires its input to be full panel tested
Infused Cannabis Material (Concentrate CO2) Unpackaged	Bulk cannabis material infused with CO2 concentrate prior to final portioning / processing / packaging.	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Infused Cannabis Material (Non-Volatile Solvent) Packaged	Packaged Final Product: Packaged cannabis material infused or coated with non-volatile solvent (mechanically extracted) concentrates.	Creating this product requires its input to be full panel tested
Infused Cannabis Material (Non-Volatile Solvent) Unpackaged	Bulk infused cannabis material (infused with concentrate derived from mechanical extraction) awaiting portioning / processing / packaging.	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Infused Cannabis Material (volatile Solvent) Packaged	Packaged Final Product: Packaged cannabis material infused or coated with volatile-solvent concentrates (e.g., hydrocarbon extract).	Creating this product requires its input to be full panel tested

NEW MEXICO'S TRACK-AND-TRACE IS CHANGING

Infused Cannabis Material (Volatile Solvent) Unpackaged	Bulk infused cannabis material (infused with concentrate derived from volatile solvent extraction) awaiting portioning / processing / packaging.	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Infused Pre-Rolls (Concentrate CO2) Packaged	Packaged Final Product: Packaged pre-rolls infused with CO2 concentrate (e.g., inside, painted, or dusted).	Creating this product requires its input to be full panel tested
Infused Pre-Rolls (Concentrate CO2) Unpackaged	Bulk infused pre-rolls (infused with concentrate that was extracted with CO2) awaiting packaging.	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Infused Pre-Rolls (Non-Volatile Solvent) Packaged	Packaged Final Product: Packaged pre-rolls infused with non-volatile solvent (Mechanically extracted) concentrates.	Creating this product requires its input to be full panel tested
Infused Pre-Rolls (Non-Volatile Solvent) Unpackaged	Bulk infused pre-rolls (infused with concentrate derived from mechanical extraction) awaiting packaging.	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Infused Pre-Rolls (Volatile Solvent) Packaged	Packaged Final Product: Packaged pre-rolls infused with volatile-solvent concentrates.	Creating this product requires its input to be full panel tested
Infused Pre-Rolls (Volatile Solvent) Unpackaged	Bulk infused pre-rolls (infused with concentrate derived from volatile solvent extraction) awaiting packaging	Test results cannot be inherited from inputs. Exception: Pesticide results can be inherited if both inputs passed
Liquid Audited Product Packaged	Packaged Final Product: Packaged Cannabis infused liquid with the intended use of: metered dose nasal spray, vaginal administration, rectal administration	Creating this product requires its input to be full panel tested
Liquid Audited Product Unpackaged	Bulk non-cannabis liquid infused with cannabis, with the intended use of: metered dose nasal spray, vaginal administration, or rectal administration.	This product may inherit its inputs test results if no additional ingredients have been added.
Liquid Infused Non-Cannabis Material	A non-cannabis liquid infused with cannabis, used as an intermediate product for the manufacturing of other liquid final products.	This product cannot inherit its input product(s) test results
Liquid Orally Consumed Product Packaged	Packaged Final Product: Packaged liquid edibles/beverages (non-tincture) intended for oral consumption.	Creating this product requires its input to be full panel tested
Liquid Orally Consumed Product Unpackaged	Bulk liquid edible/beverage prior to bottling/ Packaging.	This product may inherit its inputs test results if no additional ingredients have been added.
Liquid Topical Packaged	Packaged Final Product: Packaged liquid/gel topicals (e.g., Body oils, serums) for external use only.	Creating this product requires its input to be full panel tested
Liquid Topical Unpackaged	Bulk liquid topical base or mixture.	This product may inherit its inputs test results if no additional ingredients have been added.

NEW MEXICO'S TRACK-AND-TRACE IS CHANGING

Mechanical Extraction Process Material	Cannabis material designated for mechanical extraction (e.g., sieving, pressing) as feedstock; tracked allocation from biomass to process.	This product cannot inherit its input product's test results.
Other Inhalable Vaporizer Unpackaged	Bulk vape devices not yet in final packaging, intended for inhalation with cannabis concentrate plus non-cannabis ingredients (e.g. terpenes, hemp derived additives) prior to final packaging.	This product cannot inherit its input product(s) test results
Other Inhalable Vaporizer Packaged	Packaged Final Product: Packaged Vape products intended for inhalation that include cannabis plus non-cannabis additives (e.g. terpenes, hemp derived additives). Additives must be disclosed and compliant with applicable prohibitions (e.g., no nicotine; banned substances such as vitamin E acetate).	Creating this product requires its input to be full panel tested
Pre-Rolls Unpackaged	Bulk pre-rolls (not-infused with concentrate) awaiting packaging.	This product cannot inherit its input product's test results
Pre-Rolls Packaged	Packaged Final Product: Packaged Pre-rolls (Not infused with Concentrate).	Creating this product requires its input to be full panel tested
Seedling Packaged	Packaged Final Product: Packaged seedlings intended for retail sale.	N/A
Seedlings	Young plants started from seed awaiting vegetative growth or packaging for retail sale	Testing is not applicable to this item
Seeds	Cannabis seeds held in inventory (not packaged for sale) awaiting use in plant production or packaging for retail sale.	Testing is not applicable to this item
Seeds - Packaged	Packaged Final Product: Packaged Seeds intended for retail sale.	N/A
Solid Audited Product Packaged	Packaged Final Product: A Packaged Non-Liquid Cannabis Product with the intended use of: metered dose nasal spray, vaginal administration, rectal administration	Creating this product requires its input to be full panel tested
Solid Audited Product Unpackaged	Bulk non-cannabis solid infused with cannabis, with the intended use of: metered dose nasal spray, vaginal administration, or rectal administration.	This product may inherit its inputs test results if no additional ingredients have been added
Solid Infused Non-Cannabis Material	Non-cannabis solid (e.g., butter, chocolate, gummies base) infused with cannabis, used as an intermediate product from which other solid product can be made.	This product cannot inherit its input product's test results

NEW MEXICO'S TRACK-AND-TRACE IS CHANGING

Solid Orally Consumed Product Packaged	Packaged Final Product: Packaged solid edibles (e.g., gummies, chocolates, baked goods).	Creating this product requires its input to be full panel tested
Solid Orally Consumed Product Unpackaged	Bulk edible solids prior to final portioning and packaging	This product may inherit its inputs test results if no additional ingredients have been added
Solid Topical Packaged	Packaged Final Product: Packaged solid/semi-solid topicals (e.g., balms, salves) for external use.	Creating this product requires its input to be full panel tested
Solid Topical Unpackaged	Unpackaged solid-form topical product that remains in bulk prior to being portioned, or packaged.	This product may inherit its inputs test results if no additional ingredients have been added
Volatile Solvent Extraction Process Material	Cannabis plant material that is prepared and designated as input for extraction using volatile solvents such as butane or propane. This material is tracked from its original biomass through the extraction process.	This product cannot inherit its input product(s) test results
